**Consciousness Coaching Sessions**

Allow me the opportunity to congratulate you on the successful coaching sessions you conducted during October to November 2009. The results it's currently yielding are outstanding.

Although sceptical at first, but as we progressed into the unknown you equipped me with the relevant awareness tools which unlocked the potential within. The interactive conversations during our coaching sessions created the necessary shift in consciousness which left me complete as well as empowered and inspired to make positive life changes.

Based on my experience, I'll definitely recommend your services to executives of other companies and thereby allowing them to benefit from your coaching methods and consciousness guidance processes.

Wishing you all the best on your journey in enlighten your fellow man.

Yours sincerely

Dirk Devis,

### **Executive Coaching Sessions**

It is a pleasure to congratulate you with the results from our coaching session held during January to February 2009.

In fact, I believe it was successful in two ways, for you providing the process and guiding my company successfully, and for me, getting the clarity and results I was after.

I also have to admit that I was a bit sceptical in the beginning but as we progressed, you introducing awareness tools and I receiving more clarity on my goals, I became more aware of the power in "not trying so hard", but rather think everything through and then spring into action.

Your coaching methods and process guided me in bringing clarity on what I need to focus on but also directed me to go over into action, getting the things done that delivers value.

I trust that other businesses would also benefit tremendously from following your conscious coaching process and wish you success in your engagement with them.

I will keep you posted on reaching the set milestones from my new company goals, and most important the results that will be flowing from that.

Sincerely,

Jasper Marais

Managing Director

2 February, 2010.

## TO WHOM IT MAY CONCERN

*Since the end of 2009, I had the privilege to spent one and a half hour per week, for 10 consecutive weeks, with a Consciousness Coach, namely Dirk Devis. I felt completely free to be totally authentic and transparent in his supportive and unbiased presence. He gently guided me to do introspection and to embrace and celebrate my strengths, but more importantly to face my weaknesses and to address them on a deeper subconscious level. During the process I realised that I could push myself much harder to move closer to my ideals and dream. He allowed me to move gracefully beyond my comfort zone and to actualise untapped potential. It has been three weeks since we concluded the process and I am still aware of the shift in consciousness and the spurt of growth that took place. I am aware of an inner shift, but there are also tangible results to prove the benefit derived from this incredible journey. Thank you once again Dirk*

*Blessings,*
